BorgWarner beliefert führenden chinesischen Automobilhersteller mit E-Motoren

- Elektromotoren von BorgWarner werden in Dedicated Hybrid Transmission (DHT)- und in Range Extended (REEV)-Elektrofahrzeugen des Herstellers eingesetzt
- BorgWarner erschließt den DHT- und REEV-Markt mit hocheffizienten, kompakten und wettbewerbsfähigen High Voltage Hairpin Motoren

Auburn Hills, Michigan, 4. Mai 2023 – BorgWarner wurde ausgewählt, HVH (High Voltage Hairpin)-E-Motoren an einen führenden chinesischen Automobilhersteller zu liefern. Sie kommen in den DHT und REEV-Elektrofahrzeugen des Herstellers zum Einsatz. Die Serienproduktion soll im August 2023 in Tianjin beginnen.

„Der HVH-Motor von BorgWarner stellt für solche Anwendungen einen langlebigen und leistungsstarken elektrischen Antrieb dar. Mit dieser Technologie stärken wir unsere führende Position im DHT- und REEV-Markt“, sagte Dr. Stefan Demmerle, President und General Manager, BorgWarner PowerDrive Systems. „Wir freuen uns, den chinesischen OEM mit unserer neuen Motorenlösung bei den wachsenden Herausforderungen im Bereich New Energy Vehicles unterstützen zu können und so unsere Partnerschaft zu stärken.“

Der HVH-Motor verfügt über ein kompaktes Design mit optimierter Leiter-Wicklungs-Struktur für kürzere Ausmaße. Dadurch eignet er sich für kleinere Bauräume und verbessert die Effizienz.

Die Konstruktion des Motors erlaubt die Verwendung von schweren seltenen Erden und damit auch die Kosten zu reduzieren. Die Optimierung des Steckplatzes sorgt für ein besseres NVH-Verhalten des Motors und damit für ein leiseres Fahrzeug entsprechend den Anforderungen des Kunden.

Further, all statements, other than statements of historical fact contained or incorporated by reference in this press release that we expect or anticipate will or may occur in the future regarding our financial position, business strategy and measures to implement that strategy, including changes to operations, competitive strengths, goals, expansion and growth of our business and operations, plans, references to future success and other such matters, are forward-looking statements. Accounting estimates, such as those described under the heading "Critical Accounting Policies and Estimates" in Item 7 of our most recently-filed Annual Report on Form 10-K ("Form 10-K"), are inherently forward-looking. All forward-looking statements are based on assumptions and analyses made by us in light of our experience and our perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. Forward-looking statements are not guarantees of performance, and the Company's actual results may differ materially from those expressed, projected or implied in or by the forward-looking statements.

You should not place undue reliance on these forward-looking statements, which speak only as of the date of this press release. Forward-looking statements are subject to risks and uncertainties, many of which are difficult to predict and generally beyond our control, that could cause actual results to differ materially from those expressed, projected or implied in or by the forward-looking statements. These risks and uncertainties, among others, include: supply disruptions impacting us or our customers, such as the current shortage of semiconductor chips that has impacted original equipment manufacturer ("OEM") customers and their suppliers, including us; commodity availability and pricing, and an inability to achieve expected levels of recoverability in commercial negotiations with customers.
